

Automation Planning Lab

LEARN AUTOMATION

This starter hands on lab is included with the TovarTech website as a polished placeholder. Replace or expand it with your complete training content as your course library grows.

Suggested learning workflow

1. Review the learning objective and prerequisites.
2. Build or prepare a safe practice lab environment.
3. Follow each step and record your results.
4. Troubleshoot unexpected results using logs and documentation.
5. Repeat the lab without the guide to confirm mastery.
